

ACTIELEC Technologies

**2001 Sales: up 37.6% to EUR 184.7 million
with 22.2% on a like-for-like basis**

Forecasts exceeded despite a difficult market climate

ACTIELEC Technologies, which specialises in electronic systems for the collection, processing and transfer of information, is a leader on the buoyant markets for automotive electronic diagnosis, image and sound distribution and microwave (hertzian) communications (digital TV and radio rebroadcasting). The company plays an active part in the development of products for new markets. It is present in 12 countries.

**The 2001 annual
results will be published
on April 9, 2002.**

Against a difficult economic backdrop, ACTIELEC Technologies exceeded its 2001 sales target (EUR 176 million) to generate a remarkable EUR 184.7 million, up 37.6%. Organic growth was 22.2%.

More than a third of ACTIELEC Technologies' sales were realised overseas.

The Group's activity is based on recurrent business that accounts for 70% of sales.

All of the Group's activities contributed to this performance, with the automotive division accounting for 62.6%, telecommunications accounting for 20.7%, oceanography 3.8% and production 12.9%.

Growth outlook for 2002

At the end of December 2001, the group signed four new pluriannual contracts with a number of major market players, which should represent annual revenues of around EUR 20 million as of 2002.

For 2002, ACTIELEC Technologies is banking on growth in double figures.

ACTIELEC Technologies aims to pursue its growth and profitability strategy with two main objectives:

- to strengthen its market positions,
- to win over new market niches.

Furthermore, the Group aims to sell any non-strategic activities as and when the opportunity arises.
