Sales for the company's Automotive division held steady at EUR 177.4 million despite it putting an end to the low margin, small-scale outsourcing contracts which accounted for EUR 10 million in 2004. After a year in 2004 that was marked by a major one-time contract, Actielec's Automotive division pursued its structural growth in 2005 with the rolling out of new products such as its multi-brand diagnostics equipment (Multidi@g) and multiplexed instrument panel (Podium), and the very first sales of its tachographs despite the repeated delays in the application of the relevant European legislation

Sales for Actielec's Telecommunications division came out at EUR 17.0 million for the final quarter of 2005, once more confirming the highly seasonal nature of an operating cycle which represents 42.4% of the Telecommunications division's annual sales. The division's full-year sales of EUR 40 million in 2005 were impacted by the drop in activity for earth stations that was only very slightly offset by the increase in sales for TNT transmitters. That said, the signing of an EUR 54.4 million earth station contract over several years should, once the design phases are complete in 2006, boost the Telecommunications division's sales between 2007 and 2012.

Sales realized by the Group's overseas entities grew 2.5% to EUR 83.0 million, accounting for 38.1% of total sales.

Outlook

For 2006 as a whole, ACTIELEC Technologies Group is aiming for growth of between 4 and 6%, a figure which factors in the gradual recovery of its Telecommunications business (TNT, networks, earth stations).

Next publication: yearly results on March 31, 2006.
