

ACTIELEC Technologies

2006 Revenue : EUR 222.1 million

In EUR millions	Q4 2005	Q4 2006	Change in EUR millions	Change as a %	2005	2006	Change in EUR millions	Change as a %
Automotive	44.6	54.8	+ 10.2	+ 22.9%	177.5	184.8	7.3	+ 4.1%
Telecommunications	17.0	16.1	- 0.9	- 5.4%	40.0	37.3	- 2.7	- 6.9%
Total	61.6	70.9	+ 9.3	+ 15.1%	217.6	222.1	4.5	+ 2.1%

ACTIELEC Technologies enjoyed a strong fourth quarter with revenue up by 15.1% on the same period one year earlier. This performance boosted 2006 revenue to EUR 222.1 million, up 2.1%.

The Automotive division posted annual revenue growth of 4.1% thanks to a 22.9% rise in the fourth quarter. As expected, this performance was based on sales of diagnostic tools, the tachograph and the telematic portal, the Group's flagship products which boast major development potential. The Automotive business now accounts for 83.2% of total revenue.

The Telecommunications division generated fourth-quarter revenue of EUR 16.1 million, representing 43.1% of annual revenue, once again attesting to the highly seasonal nature of the business. In 2006, Telecommunications revenue fell by 6.9% to EUR 37.3 million, mainly due to the deferral of the last deliveries of the year, which represented EUR 1.4 million.

Lastly, revenue outside France increased by 8.3% to EUR 90.0 million, i.e. 40.5% of total revenue.

Outlook for 2007

ACTIELEC Technologies has set a revenue target of EUR 235 million, i.e. growth of 6%.
