Figures have not been audited

ACTIELEC Technologies had an excellent third quarter, with sales increasing by 21.2% to €58.4 million

(in € millions)	9 months 2006	9 months 2007	Change
Automotive	46.8	54.1	+ 15.7%
Telecommunications	56.2	65.0	+ 15.6%
TOTAL	48.2	58.4	+ 21.2%

Figures have not been audited

About ACTIELEC Technologies :

Actielec Technologies specializes in systems for the collection, processing and transfer of data, and is industry leader in the profitable automobile diagnostics, embedded systems for buses and coaches, and wireless transmission markets.

The Group actively contributes to the development of products in new niche markets.

It is present in 15 countries worldwide.

As expected, the sales of the Automotive division continued to rise sharply, by a total of 19.6% to €48.8 million, in all of its markets (Diagnostics, Embedded systems, and Services), with the success of the new strategic products launched at the end of 2006.

The sales generated by the Telecommunications division rose by 30.2% to €9.5 million.

Growth for the first nine months is on plan

These excellent results bring total sales for the first nine months of the year to €177.5 million, a 17.4% increase over the first nine months of 2006 and perfectly in line with the Group's objectives.

It is also worth noting that the percentage of sales generated by the non-French subsidiaries remained unchanged at 41.6%.

Financial position

The cash generated by third-quarter sales enabled a slight reduction of the Group's net debt. Actielec Technologies improved the medium/short-term structure of its balance sheet, enabling the Group to obtain more favorable terms for financing its organic growth.

Outlook

As there was less pronounced seasonal variation in sales this year, the Telecommunications division should post a decrease in sales during the fourth quarter, but will still report positive growth for the full year (as provided for in the Group's strategic plan).

The Automotive division expects fourth-quarter sales to be close to those of the previous year, which were unusually high.

Actielec Technologies therefore expects to exceed its annual sales target of €240 million, which the Group had already revised upwards in August, and confirms its 4% operating margin target.

Moreover, Actielec Technologies's recent commercial successes, especially with multiplexing in China and the telematics portal in Japan, and its obtainment of its second award for shock absorber testers at the EquipAuto trade show, should enable the Group to maintain its growth in 2008.
